Trip to Britain Sept. 1995

Sept. 7 - Got all my stuff into my two new pieces of luggage & we had all preps. finished when Mike arrived to take us to the airport. Great to have his send-off.

Sept. 8 - London It was a good flight - foot room for Fred, lovely dinner, window seat but one silly fellow laughed almost non-stop, loudly at the movie. So rather tired especially after a slow passage through Immigration & then 1½ hrs on the bus to reach the Tavistock. However taking the rest of the day at a slow pace has us feeling pretty normal this evening & ready to start sight-seeing tomorrow

Sept. 9. - London This was a great day. Felt normal on arising to a lovely comfortable sunny day, and even better after the generous Tavistock English breakfast.

Went first to visit Tower Bridge which looked just splendid looming behind sunlit London Tower. It is a beautiful piece of design & strength seen from any angle & I

am so thrilled to be better acquainted with it now. We went up the N. tower on the tour & across both walkways where the views are splendid & there were fascinating photos on display

Headed next for the London Museum where we had a welcome lunch at their cafeteria. Too bad their Roman Britain galleries were not open so we saw more of the Barbican development on our way back to the subway. Went next to the Br. Mus. where Fred took pictures of their Roman Britain exhibits for a new Course?

Sept. 10/95 - London to Hillfarm We were up for the 8:00 a.m. service at St. Pancras & then had our lovely Lavistock breakfast. After checking out took a taxi to Liverpool station & the fairly short train ride to Ipswich wh. it was great to have Keith meet us. Before dinner (lovely) he took us & see St. Mary's old church in Grundisburgh. Getting back into viewing interesting old churches & learning history at the same time.

Sept 16/95 ~~Hill Farm - Woodbridge - Bury St. Edmonds~~ - this was the a.m. for Fred's blood test in Woodbridge wh. Keith had arranged.

Of St. Mary's Ch. the entire flint exterior was very interesting inside ditto the font + cover & rood screen panels. Tower is very grand. Noteworthy is tomb of Th. Seckford in chancel After a quick lunch Keith took us to Bury St. Edmonds wh. there was a great deal to see within the confines of the Abbey of St Edmund dedicated to the memory of St. Edmund, the martyred 9th century King of the East Angles. The gardens were breathtaking!! & then we spent a lot of time in the cathedral, followed by a visit to St. Mary's Church & a closer look at the Norman Tower & the Abbey Gate. There was so much to see it became a bit confusing.

Another wonderful day of sites & sunshine. Lavenham first where the half timbered bldgs. as shops & houses were fascinating. finished up with their wealthy church.
After lunch drove to Denston & St. Nicholas' church - the second church which W. L. Suttaby MA served. This was quite a thrill as the church was very attractive inside with many points of interest. Its condition was terrible after the war but now is lovely after much restoration.
Poslingford's St. Mary's has less inside interest and unfortunately could only be entered through someone bringing the keys. We did find the tombstone of W. L. S. & C. E. S. much covered with moss, near the porch door - the memorial plaque to William & his wife & the list of rectors. We also located the Old Vicarage & got a tiny peek at the grounds. Lawn was huge and in both parishes there was much to ponder & be excited about.

Sept 13/95 Hill Farm → Ipswich → Peterborough → Dundee → Aberdeen → Edinburgh →

F 95.1.~~33~~45 Hill Farm - Keith + Pippa before we left Hill Farm
GM We were breakfasted & ready to drive in to Ipswich in lots of time. Keith has given us a wonderful time with all his hospitality, hours of driving & lovely meals. We felt very sorry to leave him for, were it not for people around who are renting space in his bldgs. & pastures, he could be very lonely now. He can't keep up with all

the outside work now on grounds & bldg. repairs & may not care if he does without Shirley there. And yet he would not want to live anywhere but in his charming XVI century farm house where he grew up. It's one of the sad ways in which a life unfolds.

The trip northward went off very well. The clouds were beautiful - big cotton-wool ones with blue sky behind them - as seems typical of Suffolk. The farm country around Ely was interesting too with all its ditches & canals to drain away the excess water. More rolling agricultural land as we went northward & finally quite alot of travel near the sea as we neared Edinburgh to change trains for Aberdeen.

Firth of Forth after Edinburgh was very spectacular & likewise Solway Firth after Dundee. Scottish scenery in these parts very different from that of Suffolk! Bldgs are frequently of well dressed stone & the countryside more rugged. Taxi driver to our Bentwood Hotel from the station said a solid week of rain had just ~~continued~~ ended

Sept. 14/95 Aberdeen → Turriff → Delgatie → Elgin
Had wonderful Finnan Haddie at the Beaverwood Hotel before we took a taxi (driver explained about all the grey granite used in the bldgs. of Aberdeen) to the airport to pick up our Ford Escort rented car. A bit hairy on leaving the airport area on our way to Turriff & Delgatie Castle but things got better with Fred keeping further from the left curb. Had a lovely lunch in a Turriff pub before the excitement of Delgatie C. It was a thrill to see the Castle & its developing gardens outside. Mrs. Johnson welcomed us warmly into the castle & we enjoyed going up the spiral stairs to visit the 6 floors. The undertaking of Captain John Hay to restore the castle in the last 40 years plus is very moving. Our whole visit was a great thrill. Fred gave me the Hay tartan for a new shirt so I will always remember this day

We went on to Elgin where we are staying at the sumptuous Mansion House Hotel - this is a real treat. Went for a walk & saw the swift flowing river & some flooded areas.

A 95.2.5 Elgin - Mansion House Hotel

Our stay at the Mansion House has been the luxury accommodation of this trip. Breakfast with a delicious kippered herring was a great treat.

We made our way next to Elgin Cathedral, ruined like so many others though once Scotland's most beautiful cathedral. In recent years restoration has gone on & the grounds & cemetry are now very well kept. Bought several gifts there

Found our way out of Elgin to Pluscarden Abbey wh. like the Cathedral was burned by the Wolf of Badenoch in 1390. Restoration was started

in 1897 & continues today with a Benedictine group living & working there. Much was destroyed but it is again imposing and very peaceful.

A 95.2.10 Elgin - Pluscarden Abbey view s.e. end.

On leaving ate the lovely lunch prepared at the Mansion House for us as we drove toward Inverness. Made our way across bridges over firths & then up the n.e. coast to Wick. Scenery very lovely at times, at others we saw rolling hills rosey with heather. Raining when we reached Wick but found our B&B on the main street - the County Guest House - & are comfortably settled in.

This really was a day + a half! First a lovely breakfast at our Country Guest House B.+B with all their hand-painted china from Wales.

Simply lovely to feel so out in the open at our 1st stops under a huge cloudy sky N. of Wick.

John O'Groats really did feel like the end of the road but it was surprising to see how much settlement there was there. The cliffs were really awe-inspiring + the whole atmosphere was certainly memorable. Had lunch there after doing the gift shops.

Next part of the drive was relatively easy as the road was two laned. Farm bldgs. more substantial + prosperous looking than I expected. But they + the animals became less frequent as we went along + peat bog type of terrain took over. From Neats Tongue the terrain was increasingly severe + inhospitable looking, some fog made for a more scarey situation + the one track road made driving a great strain. Great relief to reach Dunnes in the rain + our Parkhill Hotel where we had dinner. It all seems so isolated in these wild + lovely areas.

Good breakfast & then off into the unsettled weather & see the Balnakiel old ruined church & then Smoo Cave (quite remarkable). There was some one lane road again which I find very nerve wracking but there was really alot of 2 lane road today, wh. helped alot. Gradually the austere good only for peat & sheep land gave way to a surprising number of lochs (lakes) & beautiful scenic mountains in the distance. This must be Scottish beauty. Ullapool has a spectacular location right on loch Broom. From our Arch Inn Hotel we have a grand view of the loch.

Breakfast at "The Tables" was very generous. I had another kipper. Did a good deal of driving around n. Skye in lovely sunny weather. The basaltic outcrop "The Quiraing" above Staffin was awesome. Between more one lane roads, more lovely Scottish vistas, more sheep & more lochs with loch Ness at the end of our day we have had a lovely addition to our Scottish memories. Some Thoughts for a Possible Second Trip to Scotland

Travel light!

My '95 new suitcase was too big & too heavy
If a big suitcase is needed again because
of visiting in 3 or more places consider
starting at Mary's where some things
could be left while we take only some on
the next leg. Bring a fanny pouch & small purse for dress up
& a pack pack
for a B & B. driving jaunt take only the
minimum which could then be carried up
narrow steep stairs easily. A big suitcase
gets left in the car. Hiking boots as well as
Adida type good to have. Most useful are
2 pairs of jean-type pants & go with a mix.
of sweaters or sweat shirts with sev. shirts or
turtle neck tops & go under the outer garm.
A water proof jacket essential, also a hood,
umbrella, salve for stings, gloves, warm hat
On the driving - if road curving 50 m.p.h. feels
fast enough with slow down on curves. If
on a one track emphasize staying in mid. of road.
Driving holiday likely to be suggested again because
I feel loved it so but insist another time that
plans for hiking be included instead of sitting in
a car so much of the time.

Sept. 21 Crianlarich → Glasgow → Lancaster

Had a good place to stay last night but had to leave without breakfast this a.m. as we left the hotel at 7.30. Were very glad when we found breakfast in a hotel at Buss ca. 9.00 a.m. when we were quite wobbly. Drove down loch Lomond then feeling much better & into Glasgow airport where we got lost but left the car at Budget with rather mixed feelings. Having a car enabled us to see a good deal but the driving involved was very hard on my nerves. Another time instead (if one!) we must plan to walk more instead of being cooped for hours in a car.

Sept. 22 Lancaster → Vindolanda → Vallum Lodge

It was lovely to be met at Lanc. station by Mary yesterday afternoon but because of the lost day we had to rush immediately reply to start off for Hadrian's wall today, spent the aft. at Vindolanda where there was lots to see.

Mary hopped from one activity to another today. School drive for Peter & Paul first. Then she, Hannah, Fred & I had coffee & a sweet in Bentham before Fred's blood test wh. unfortunately gave the same too thick reading, 1.3, as last Friday. Extra asmadin on Sat. & Sun. has not brought it down. Hannah started play group after lunch & then we three went in to Wray school wh. Fred told the kids about the Romans. Picked up Hannah next & later the boys. Everyone a bit tired at dinner & no wonder!

Mary & I went to pick mushrooms in the Gorst's field in the aft. This walk gave me a chance to learn where things are with Mary's problems - voice doing well, must keep it relaxed as straining makes it worse. Stress is a contributing factor & she must learn to handle stress better. But how will this ever be when she "feels torn in two directions" & James is no nearer leaving England?

Our last day in London started with Morning Prayer & Communion at Westminster Abbey where the two services were lovely even if the choir did too much of the singing! Had a last visit at the Br.
